

'Development that meets the needs of the present without compromising the ability of future generations to meet their own needs.'

Further and higher education colleges have a significant impact on the environment through resource usage and waste generation. As well as dealing with these issues, they have a duty to demonstrate best practice on sustainable development to all their clients, partners, staff and especially, students.

Bearing this in mind, Cornwall College have agreed to make a common pledge to enhance sustainable development in order to reduce their impact on the environment by:

- Prudent use of resources
- Reducing waste to landfill
- Reducing consumption of energy and water
- Promoting green travel

Promoting sustainable practices within the education and daily activities of the college, and to the wider community.
